| Foreword | V | |
| Preface | VI | |
| Statements of Partners | VIII | |
| Index of Tables | XIII | |
| Index of Figures | XV | |
| Index of Abbreviations | XVII | |
| | | |
| Part I | »Pandemic Logistics« – a Management Summary and trend discussion | 1 |
| I.1 | Logistics megatrend review 2022+ | 3 |
| I.1.1 | Globalisation – Volatility in goods flows | 3 |
| I.1.2 | Demographic change – Ageing societies, immigration and urbanisation .. | 3 |
| I.1.3 | New lifestyles – High demand for convenience in business and consumer markets | 4 |
| I.1.4 | Servitisation | 5 |
| I.1.5 | Sustainability | 5 |
| I.1.6 | Rising risks and threats – Political and economic instability, climate change, natural catastrophes, terrorism and cybercrimes | 6 |
| I.1.7 | Innovative technologies – Digital transformation, Automation and Analytics | 7 |
| I.1.8 | New challengers – Innovative approaches from the outside | 8 |
| I.1.9 | Professionalisation – Efficiency of logistics operations | 8 |
| I.1.10 | Shareholder value objectives in logistics – Effectiveness of logistics operations | 9 |
| I.2 | Most recent current challenges | 9 |
| I.2.1 | Foothills of the Corona crisis | 10 |
| I.2.2 | Lack of truck drivers leads to tight road freight capacities | 13 |
| I.2.3 | Digitalisation implies investments of above 2% of turnover | 14 |
| I.2.4 | Start-ups role in logistics | 15 |
| I.3 | Transporeon Feature – Network Horizon 2021 | 19 |
| | | |
| Part II | Defining logistics as a market – the object of the »TOP100« study | 25 |
| II.1 | »What ?« – A definition of logistics as a market | 25 |
| II.2 | »Where ?« – Geographical boundaries considered | 26 |
| II.3 | »When ?« – Time period and data considered | 27 |
| | | |
| Part III | Measuring the European business logistics system 2020 – a total systems cost perspective | 29 |
| III.1 | On the process for estimating European logistics system spending | 32 |
| III.1.1 | The first approach to measuring the cost of the national business logistics system: from freight tonnage to »PPP« logistics | 32 |
| III.1.2 | A demand-side approach to estimating Europe’s logistics system expenditures | 38 |
| III.2 | Interim result: A »robust« estimate of the total expenditure volume of the logistics system of »Europe of 30« | 42 |

| | | |
|-------------------|---|------------|
| III.3 | From € 1,115 bn. logistics volume for the whole of »Europe of 30« to a split for the national logistics volumes per country | 43 |
| III.4 | Logistics expenses forecast for Europe and selected countries | 45 |
| Part IV | Segmenting European logistics: Key logistics segments and their profiles | 49 |
| IV.1 | Alternative approaches to logistics segmentation | 49 |
| IV.2 | A quantitative preview | 53 |
| IV.3 | Bulk Logistics | 57 |
| IV.4 | General Full-Truckload (FTL) Transportation | 63 |
| IV.5 | General Less-than-Truckload (LTL)Transportation | 71 |
| IV.6 | Specialised Surface Transportation | 78 |
| IV.7 | Courier, Express and Parcel (CEP) Transport Services | 85 |
| IV.8 | Contract Logistics | 93 |
| IV.9 | Terminal, General Storage and other Logistics | 101 |
| IV.10 | Global Air and Ocean Cargo Logistics | 107 |
| IV.11 | Small and Medium Enterprise (SME) Logistics | 115 |
| Part V | The TOP100 lists for Europe and the largest European countries | 119 |
| V.1 | The top list: conventions and commentaries | 119 |
| V.2 | The TOP100 in Europe | 119 |
| V.3 | TOP lists for the largest logistics economies in Europe | 127 |
| V.3.1 | TOP list Germany | 128 |
| V.3.2 | TOP list France | 129 |
| V.3.3 | TOP list United Kingdom | 130 |
| V.3.4 | TOP list Italy | 131 |
| V.3.5 | TOP list Spain | 132 |
| V.3.6 | TOP list Netherlands | 133 |
| V.3.7 | TOP list Poland | 134 |
| V.3.8 | TOP list Switzerland | 135 |
| Appendix 1 | The ABC of company profiles of the European TOP100 | 137 |
| Appendix 2 | Notes on definitional and methodological problems and limitations | 417 |
| Appendix 3 | Questionnaire | 425 |
| Appendix 4 | References. | 431 |

Index of tables

| | | |
|-----------------|---|----|
| Table 1 | EU 30 Tons transported by modes of transport (inland and out-bound) 2005 to 2020 | 31 |
| Table 2 | EU 30 Modal split 2005 to 2020 | 31 |
| Table 3 | Summary of total freight volume and revenues for European road freight cargo in 2020 | 33 |
| Table 4 | Outline of total freight volume and revenues in the »Europe of 30« in 2020 | 35 |
| Table 5 | Total logistics transaction volumes according to cost types for »Europe of 30« in 2020. | 37 |
| Table 6 | The European economy's goods flow system in 2020 (2018 extrapolated) | 40 |
| Table 7 | Data table: overall logistics expenses for »Europe of 30«, 2017 to 2020 | 45 |
| Table 8 | Data table: overall logistics expenses forecast for selected countries and »Europe of 30«, 2021 to 2025 | 47 |
| Table 9 | Expenditure on logistics services according to segments and logistical functions | 53 |
| Table 10 | Distribution of logistics costs according logistics and industry segments | 54 |
| Table 11 | Quantitative profile of logistics segment »Bulk Logistics« | 59 |
| Table 12 | The European top 10 in »Bulk Logistics«. | 61 |
| Table 13 | Quantitative profile of logistics segment »General Full-Truckload (FTL) Transportation« | 65 |
| Table 14 | The European top list in »General Full-Truckload (FTL) Transportation« | 67 |
| Table 15 | Quantitative profile of logistics segment »General Less-than-Truckload (LTL) Transportation« | 73 |
| Table 16 | The European top 15 in »General Less-than-Truckload (LTL) Transportation« | 75 |
| Table 17 | Quantitative profile of logistics segment »Specialised Surface Transportation« | 80 |
| Table 18 | The European top 15 in »Specialised Surface Transportation« | 83 |
| Table 19 | Quantitative profile of Logistics Segment »CEP« | 87 |
| Table 20 | The European top 15 in »CEP« | 90 |
| Table 21 | Quantitative profile of logistics segment »Contract Logistics« | 95 |
| Table 22 | The European top 15 in »Contract Logistics« | 98 |

| | | |
|-----------------|---|-----|
| Table 23 | Quantitative profile of logistics segment »Terminal, General Storage and other Logistics« | 102 |
| Table 24 | The European top 10 in »Terminal, General Storage and other Logistics« | 104 |
| Table 25 | Quantitative profile of logistics segment »Global Air and Ocean Cargo Logistics« | 108 |
| Table 26 | The European top 15 in »Global Air and Ocean Cargo Logistics« | 111 |
| Table 27 | The European Ocean Cargo carriers/container liners | 112 |
| Table 28 | Quantitative profile of segment »SME Logistics« | 116 |
| Table 29 | The »Top 100« list – The top logistics service providers in Europe | 121 |
| Table 30 | Top 20 largest LSP in Germany in 2019 | 128 |
| Table 31 | Top 15 largest LSP in France in 2020 | 129 |
| Table 32 | Top10 largest LSP in the United Kingdom in 2020 | 130 |
| Table 33 | Top 15 largest LSP in Italy in 2020 | 131 |
| Table 34 | Top 10 largest LSP in Spain in 2020 | 132 |
| Table 35 | Top 10 largest LSP in the Netherlands in 2020 | 133 |
| Table 36 | Top 10 largest LSP in Poland in 2020 | 134 |
| Table 37 | Top 10 largest LSP in Switzerland in 2020 | 135 |

Index of figures

| | | |
|------------------|--|-----|
| Figure 1 | Logistics challenges 2021/2022 | 10 |
| Figure 2 | When do logistics businesses recover from the crisis? | 11 |
| Figure 3 | Does COVID-19 lead to consolidation in logistics?. | 12 |
| Figure 4 | Operational topic: Lack of truck drivers | 13 |
| Figure 5 | Necessity of major investments because of digitalisation trend | 14 |
| Figure 6 | Investments in digitalisation in logistics | 15 |
| Figure 7 | Perception of start-ups in logistics | 15 |
| Figure 8 | Interesting start-ups mosaic 2021/2022 | 16 |
| Figure 9 | Basic definition of logistics: transport, handling and storage outside the production process | 26 |
| Figure 10 | a and b: Geographical demarcations. »Outbound« – attributed to the homeland, »Inbound« – not attributed to the homeland | 27 |
| Figure 11 | Development of EU 30 logistics volume (in € and percentage change) | 29 |
| Figure 12 | EU 30 Transport volumes by modes of transport in 2020 | 30 |
| Figure 13 | EU 30 Revenues of transport cargo by modes of transport in 2020 | 36 |
| Figure 14 | EU 30 Logistics expenditure by cost type in bn. € | 37 |
| Figure 15 | Goods flows in an national economic system (schematic) | 38 |
| Figure 16 | Spread of European logistics expenditures 2020 | 44 |
| Figure 17 | Concentration of European logistics expenditures 2020 | 44 |
| Figure 18 | Development (until 2020) and forecast of EU 30 logistics volume until 2025 (in bn. €) ¹ | 47 |
| Figure 20 | Logic of logistics segment differentiation. | 50 |
| Figure 21 | Logistics segment split Europe 2020. | 55 |
| Figure 22 | Logistics segments and their estimated »insourced« and »out- sourced« shares in 2020 | 56 |
| Figure 23 | Shipping industries segmentation of »Bulk Logistics« | 60 |
| Figure 24 | Shipping industries segmentation of »Specialised Surface Transportation« | 81 |
| Figure 25 | Shipping industries segmentation of »CEP« | 87 |
| Figure 26 | Shipping industries segmentation of »Contract Logistics« | 96 |
| Figure 27 | Shipping industries segmentation of »Terminal, General Storage and other Logistics« | 103 |
